Technical Support

Technical Support maintains support centers globally. All support services will be delivered in accordance with your support agreement and the then-current enterprise technical support policies. For information about our support offerings and how to contact Technical Support, visit our website:

<https://www.veritas.com/support>

You can manage your Veritas account information at the following URL:

<https://my.veritas.com>

If you have questions regarding an existing support agreement, please email the support agreement administration team for your region as follows:

Worldwide (except Japan)

CustomerCare@veritas.com

Japan

CustomerCare_Japan@veritas.com

Documentation

Make sure that you have the current version of the documentation. Each document displays the date of the last update on page 2. The latest documentation is available on the Veritas website:

<https://sort.veritas.com/documents>

Documentation feedback

Your feedback is important to us. Suggest improvements or report errors or omissions to the documentation. Include the document title, document version, chapter title, and section title of the text on which you are reporting. Send feedback to:

infoscaledocs@veritas.com

You can also see documentation information or ask a question on the Veritas community site:

<http://www.veritas.com/community/>

Veritas Services and Operations Readiness Tools (SORT)

Veritas Services and Operations Readiness Tools (SORT) is a website that provides information and tools to automate and simplify certain time-consuming administrative tasks. Depending on the product, SORT helps you prepare for installations and upgrades, identify risks in your datacenters, and improve operational efficiency. To see what services and tools SORT provides for your product, see the data sheet:

https://sort.veritas.com/data/support/SORT_Data_Sheet.pdf

VIOM Patch 8.0.0.300

This document includes the following topics:

- [InfoScale for Kubernetes cluster licensing report in VIOM](#)

InfoScale for Kubernetes cluster licensing report in VIOM

The InfoScale for Kubernetes (8.0.200) release adds Core Plus License Information feature to the existing Licensing Operator that allows communication with the VIOM and InfoScale for Kubernetes cluster.

To generate the InfoScale for Kubernetes cluster licensing report in VIOM, perform the following steps:

1. Provide the IP address of VIOM Management Server in InfoScale for Kubernetes configuration.
[Ref: https://www.veritas.com/content/support/en_US/doc/158331181-158331184-0/158602202-158331184](https://www.veritas.com/content/support/en_US/doc/158331181-158331184-0/158602202-158331184)
2. If the provided IP address is valid, InfoScale for Kubernetes cluster starts sending licensing information to Management server.
3. Sign in to VIOM application to view the report (Go to **Management Server console > license perspective > Reports > InfoScale for Kubernetes – Core Plus License**)

Note: Providing your IP address while creating the license is optional; you can modify or edit the license even after creating it and can provide the IP address of VIOM (Management Server) to configure the InfoScale for Kubernetes Core Plus license Information feature.

License information is collected and send to VIOM (Management Server) at the time of providing or modifying IP address in license (or modifying license) and then after every 24hrs.

The InfoScale for Kubernetes (8.0.200) is available in the following three license editions:

- Developer
- Storage
- Enterprise

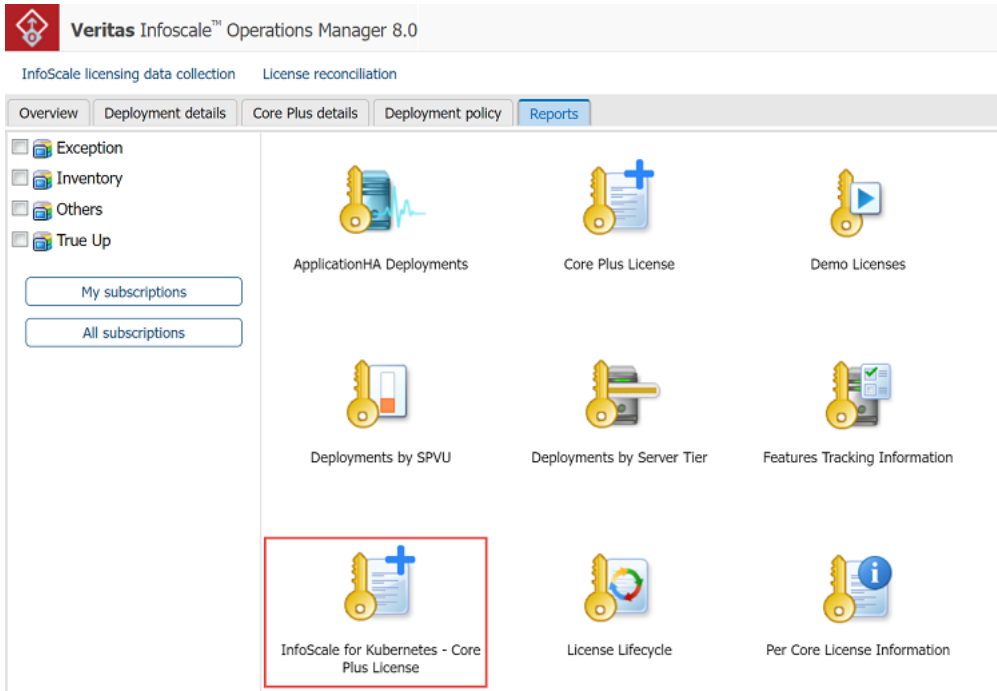

Using a standard subscription license, the Storage and Enterprise editions can be used on any number of nodes per InfoScale cluster without a valid VIOM server for a trial period of 60 days. However, after 60 days, you must connect the InfoScale cluster to a valid VIOM server and install a valid subscription license on VIOM.

Perform the following procedure to generate the InfoScale for Kubernetes – Core Plus report:

To use the InfoScale for Kubernetes – Core Plus License feature, ensure that the VIOM Management Server is at VIOM 8.0 with this patch 8.0.0.300 or later:

1. In the Management Server console, open license perspective, and click the Reports tab.

In the Reports window, click **InfoScale for Kubernetes – Core Plus License**.

The following report appears on the InfoScale for Kubernetes – Core Plus License information screen:

Subscribe Save as CSV Email

InfoScale for Kubernetes - Core Plus License Information
 This report lists the core plus credits consumed by each InfoScale Kubernetes cluster server.
